Consulting – Training – Assistance

TRANSFERRING THE FRENCH ARMED FORCES KNOW-HOW

## THE FRENCH EXPERTISE FOR YOUR **HEALTH SERVICE**

Reference operator of the French Ministry of Defence, DCI offers tailor-made solutions delivered in France or in your country, to support the enhancement and deployment of your capabilities in the field of **military medicine**.

## A comprehensive range of **training**

France overseas operations, in particular in Afghanistan and in Africa, lead the Military Health Service (SSA) to deploy personnel as close to the forces in the field as possible. Building on this know-how and on the operational feedback, DCI offers you:

### Basic training

- ◆ Combat rescue
- ◆ War surgery and medicine
- ◆ NRBC

### Environment training

- ◆ Air operations
- ◆ Naval medicine
- ◆ Mountain medicine

## An operational **expertise**

DCI transfers you the SSA operational expertise in several fields through audit missions.

- ◆ Post-traumatic stress disorder
- ◆ Health operational logistics
- ◆ Biological threat
- ◆ Epidemiology

Furthermore, the Military Health Service is an internationally renowned leader in:

- ◆ Sport medicine
- ◆ Injured persons rehabilitation and fitting
- ◆ Tropical medicine

## **Innovative** solutions

Faced with the needs of the Armed Forces, the French Military Health Service has created two entities: the Institute for biomedical research and the Central pharmacy of the Armed Forces. These two components enable it to meet specific needs expressed by the Armed Forces building on unique technologies and techniques.

Thus drugs such as lyophilised plasma or auto-injectable syringes and equipment like the MORPHEE module and vital surgery module are today renowned references. They represent an original response adapted to operational need.

## Why DCI?

DCI IS INVOLVED IN ALL THE FOLLOWING AREAS  
**LAND - SEA - AIR - ARMAMENT - GENDARMERIE**

- ◆ EXPERTS FROM THE FRENCH ARMED FORCES
- ◆ TRAINING AND ASSISTANCE DELIVERED IN ENGLISH, IN FRENCH OR THROUGH AN INTERPRETER
